Introduction

to the digital world

Welcome to the modern digital world. The world where internet and IT lead, a world where people are hungry for technology improvement and development.

A year 2009 was written. Social networks began to rise, and the light met several terms – cryptocurrency, blockchain and Bitcoin.

They brought a fresh air to the constantly growing IT sector. Blockchain did a revolution in already known technology. Fast transactions, anonymity, decentralized and unique system opened the brand new world of cryptocurrencies that we are currently in.

Now, it's time to put it to a higher level where the security of the system, the trust of the people, and the usability of the digital currencies are the most important.

Problems

of cryptocurrency technology

The arrival of the new unexamined blockchain technology and cryptocurrencies brought several main problems such as security, trust, usability and valuation that needed to be solved.

01

Trust

Currently there is no confidence in cryptocurrencies as a good investment or payment method.

02

Security

Digital wallets and exchanges suffer from lack of security and precaution against cyber attacks.

03

Usability

To the most of people, the cryptocurrencies are difficult to use.

04

Valuation

Transformation of the value of material assets into fully digital form is currently an unknown language.

Solutions

**that our system
brings you**

Where is the problems, there is the solutions. Our unique ecosystem simply and efficiently solve the main issues the modern digital world suffer from by using unique and user-friendly technologies.

Trust

A cryptocurrency that will be insured by leading insurance company and have a real value.

Security

Development of new technology for higher security of digital wallets and exchanges in cooperation with leading security corporation.

Usability

One platform to study, buy, pay, trade and change the cryptocurrencies quickly and efficiently.

Valuation

Unique technology which allows a digitalization of property in real time with high computing power.

Product

**for simple and
efficient use**

Platon Club

Platon Club is a unique platform, where we educate and help people to understand cryptocurrency and blockchain. This platform is a main application where our users can control the whole digital world we bring to them.

E

Educate

Every user have access to education materials to gain knowledge about cryptocurrencies

C

Control

Control your finances from one place, one platform

P

Pay

We will provide a prepaid payment cards for every user of Platon Club

T

Trade

Every member learns how to trade the cryptocurrencies on exchanges

S

Support

If you become a part of our Platon Club family, you can also support innovative or charity projects

Platoncoin

one system, one token

Platoncoin is the main cryptocurrency of Platon Finance ecosystem based on Ethereum ERC20 token technology. Platoncoin is the key part of our ecosystem because its used as a...

Digital Asset

To profit from your investments and to rise the value of your property

Payment method

To buy goods and services in e-shops which are partnered with us

Insurance money

To buy insurance to secure tokens in our users' wallets

Platoncoin

one system, one token

Platoncoin is the main cryptocurrency of Platon Finance ecosystem based on Ethereum ERC20 token technology. Platoncoin is the key part of our ecosystem because its used as a...

Transaction fee

To be used as a fees for transactions made via our wallets

Exchange to fiat money

To convert digital currency into fiat money through prepaid payment cards

Projects foundation

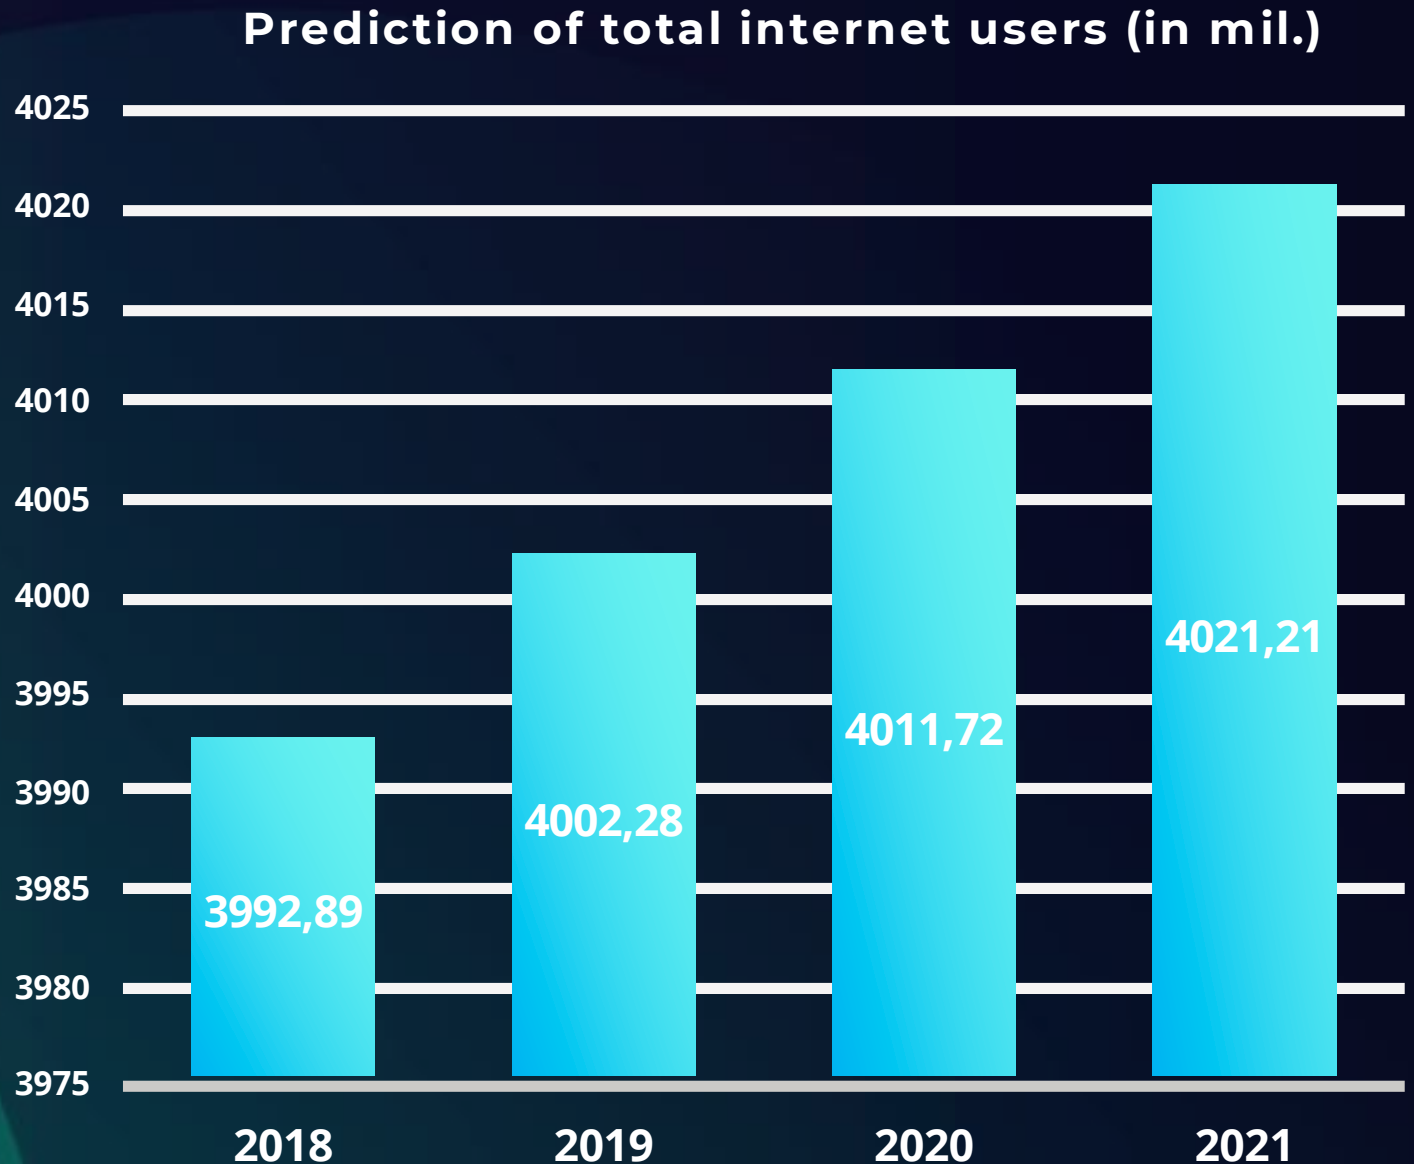

To fund innovative projects in IT, charity, environment, entertainment on our blockchain

Market overview

market potential

Based on available statistics and predictions for 2018 to 2021 is obvious growth of population together with the growth of the amount of people connected to the internet. For 2021 is predicted that almost 4021,21 mil. of people will have an active access to the internet.

Market overview

competition

Currently there exist almost 1605 tradable cryptocurrencies that can be competitive with our Platoncoin, but if we look at the business model and strategy, the main competition we have is in 4 currencies that are listed in TOP 10. We are talking about Bitcoin, Ethereum, EOS and Stellar.

These 4 have common vision and it's to develop efficient and usable ecosystem based on blockchain that will be the leader on the market.

Bitcoin
BTC

**Market capitalization
in May 2018:**

\$115,817,169,553.00

Ethereum
ETH

**Market capitalization
in May 2018:**

\$53,663,908,498.00

EOS
EOS

**Market capitalization
in May 2018:**

\$9,587,724,187.00

Stellar
XLM

**Market capitalization
in May 2018:**

\$4,412,700,623.00

Market overview

pluses

Our ecosystem have several strengths that give our unique project competitive edge and an opportunity to engage in a global cryptocurrency market.

Tokenomics

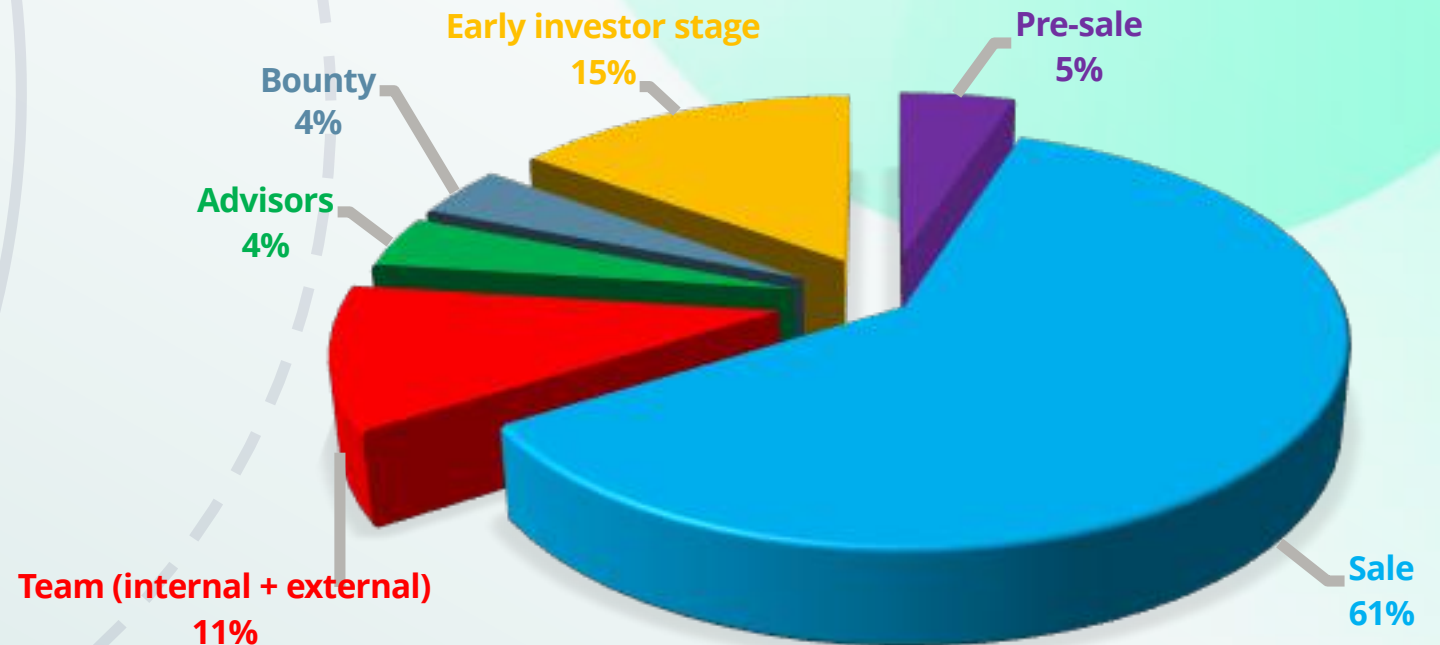

token allocation

The main token of Platon Finance ecosystem is Platoncoin (PLTC). Total amount of issued tokens is 21 millions and the pre-sale price starts at 6.00 €.

Token is divided into pre-sale, sale, team, advisors, bounty campaign and owner of Platon Finance in the following scheme.

Name of Token	Platoncoin
Ticker	PLTC
Total Issued	21,000,000.00
Pre-Sale Price	6.00 € (\$7.50)

Item	Percentage	Platoncoin (PLTC)
Pre-sale	5.00 %	1,050,000.00
Sale	61.00 %	12,810,000.00
Team (internal + external)	11.00 %	2,310,000.00
Advisors	4.00 %	840,000.00
Bounty	4.00 %	840,000.00
Early investor stage	15.00 %	3,150,000.00

Roadmap

of our successful journey

Q2, 2018

- Update of corporate identity
- Redesign of Platon Finance website
- Update and improvement of Platon Club
- Update of all materials
- Change to Ethereum ERC20 token technology

Q3 2018

- Secured and insured Platon Wallet
- Prepaid payment cards
- Platon Business Platform

Q4 2018

- Listing on exchange
- Launch of Platon Retail Platform
- Launch of platondev.com – website for developers
- Support of 1st project

Q1 2019

- Launch of Platon Club App (iOS & Android)
- Beginning of development of Security Operations Center
- Support 2nd project
